

## Strictly Business Expo 2003

Presents...

### HOME PLAN *Designs*

Tuesday, October 21, 2003 1:00 PM - 7:00 PM

Christina's Function Facility, 2 Washington Street, Rte. 1., Foxboro, MA 02035

Let's face it. Building a new home or changing an existing one involves many difficult, often expensive, decisions. Home Plan Designs helps homeowners actually "experience" their home building plans before making that final commitment to build or redesign. Using specialized architectural software, our residential designers "walk clients through" the process, taking them on a virtual, 3-D, full-color tour of the home -- or project -- they have in mind. If the results are "WOW!" our customers walk away with a complete set of blueprints, which can then be handed directly to their contractors. If not, we make the necessary adjustments, saving our clients time, money and, most of all, disappointment.

#### **Get the Answers to Your Questions Before You Build or Redesign**

If you haven't yet experienced the magic of seeing your home improvement plans take shape in front of your eyes, come see us at the Strictly Business Expo 2003. We'll give you a "live" demo of what we do, so you can see for yourself how clients have benefited from our unique "walk through it before you build it" service.

#### **No Project is Too Large or Too Small**

Whether you're considering new kitchen cabinets, a different color scheme or an addition such as a porch, deck or room extension, we can help you. Preview every detail that will be part of the final result: Will the furniture fit? Will the lighting be adequate? Will the color scheme harmonize with adjacent rooms? Whatever concerns you have, we can provide you with expert insight. Quickly and affordably.

#### **You're in Control**

From choosing the finish on your countertops to your preferred style of roofing, you are always in control. Not quite right? Change it -- before you hammer the first nail or pour the cement. It's that simple. So why wait? Let Home Plan Designs help you make intelligent choices for your home *before* you commit -- and enjoy living in the house of your dreams -- *exactly* as you had in mind!

#### **Basic Services**

- Construction plans • Engineering services • 3-D models and views • Design services
- Up-to-date information on town building regulations
- Wall/floor coverings • Landscaping designs

**Walk through it before your build it!**
